

HASAN SABAH AL-MUTTAIRI

Passport: A18180868 | **Date of birth:** 08/11/1996 | **Place of birth:** Karbalaa, Iraq |

Nationality: Iraqi | **Gender:** Male | **Phone number:** (+964) 7813838103 (Mobile) |

Email address: hassan.sa860@gmail.com |

Address: Iraq / Karbalaa, Karbalaa, 56001, Karbalaa, Iraq (Home)

ABOUT ME

Information Engineering graduate (Master's, GPA 3.72/4) with strong skills in software development, database management, web development, and AI/Deep Learning. Experienced in research, project management, and IT training. Motivated to apply technical expertise and innovative solutions in dynamic professional environments.

WORK EXPERIENCE

APPLICATION SOFTWARE DEVELOPER – GREEN TECH COMPANY – 01/01/2018 – Current – KARBALAA, IRAQ

Software Developer

- Designed and developed desktop applications using C# and Python.
- Managed SQL Server databases with Entity Framework.
- Built interactive user interfaces with DevExpress and PySide6.
- Tested, debugged, and optimized software solutions.

Web Developer

- Developed bilingual (Arabic/English) websites using HTML, CSS, Laravel, and Livewire.
- Maintained and updated websites to meet user needs.

Information Systems Specialist – Planning and Information Division

- Developed digital systems to support organizational digital transformation.
- Prepared statistical dashboards and automated reports.
- Improved workflow efficiency through IT solutions.

RESEARCHER

Researcher

- Conducted research in Artificial Intelligence and Generative Adversarial Networks (GANs).
- Published papers in international conferences.
- Collected, preprocessed, and analyzed datasets for experimental studies.

EDUCATION AND TRAINING

04/10/2022 – 30/05/2024 Istanbul, Turkey

MASTER DEGREE Altinbas University

1. **Programming and Software Development:** Proficiency in C#, Python, SQL, and object-oriented programming.
2. **Database Management:** Design, development, and administration of relational databases using SQL Server and Entity Framework.
3. **Web Development:** Building bilingual (Arabic/English) web applications with HTML, CSS, JavaScript, Laravel, and Livewire.
4. **Artificial Intelligence & Machine Learning:** Knowledge of deep learning, Generative Adversarial Networks (GANs), and data preprocessing.
5. **Research and Academic Skills:** Conducting research, publishing scientific papers, and applying statistical analysis.
6. **Problem-Solving & Analytical Thinking:** Ability to analyze complex problems and develop efficient solutions.

7. **Project Management:** Experience in planning, executing, and delivering IT projects within deadlines.
8. **Communication & Teamwork:** Strong presentation skills, academic writing, and collaboration in multidisciplinary environments.

Field of study Information and Communication Technologies (ICTs) not further defined , Software and applications development and analysis

Final grade GPA 3.72 / 4 | **Level in EQF** EQF level 7 |

National classification Master's Degree in Information Engineering (equivalent to EQF Level 7) |

Type of credits Master's Degree – 120 ECTS credits | **Number of credits** 120 |

Thesis INVIGORATE COLD CASE INVESTIGATIONS BASED ON HUMAN FACE GENERATION USING DEEP CONVOLUTIONAL GENERATIVE ADVERSARIAL NETWORK (DCGAN)

LANGUAGE SKILLS

Mother tongue(s): **ARABIC**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	C1	C1	C1	C1	C1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

SKILLS

Programming (PHP Python JavaScript HTML5 CSS3 SCSSSASSLess) | .NET/C#/Java Programming language / ASP.NET,ASP.Net Core, PHP | C# | Database: Oracle, Microsoft SqlServer, MySql | Deep Learning, | Artificial Intelligence and Machine learning | Publication of scientific articles | System Development

Enhancing Cold Cases Forensic Identification with DCGAN-based Personal Image Reconstruction

This study focuses on proposing a model of personal image reconstruction from forensic sketches using DCGAN. The model comprises two networks: a generator to convert sketch images into real images and a feature network to determine the similarity of the generated images to real ones. Forensic sketches provided by relevant authorities are used as inputs to the proposed model. These sketches include details and information on the perpetrators or missing persons obtained from witnesses or the missing person parents. Prominent facial features extracted from the reconstructed images aid in the process of personal image reconstruction. The proposed model shows good results, achieving up to 99% accuracy in the generated images. The error ratio is reported to be as low as 0.92% based on the evaluation using the CUHKFaces dataset. This study presents a new approach to reconstructing human face images from forensic sketches using DCGAN.

AL-Muttairi, Hasan Sabah K.; Kurnaz, Sefer; and Aljuboori, Abbas Fadhil (2025) "Enhancing Cold Cases Forensic Identification with DCGAN-based Personal Image Reconstruction," Baghdad Science Journal: Vol. 22: Iss. 2, Article 29.

RECOMMENDATIONS

Prof. Dr. Abbas Fadhil Aljuboori Professor

I know Mr. Hassan Sabah Kadhim since more than 8 years ago as one of my best students who I know in my Classes and as a professional technician in my lab. Hassan is a hard worker, clever, honest and sincere in his duties as a student in the theoretical topics and a technical in the lab. I know him as a very keen person with a wonderful, nice and high manner personality. He is also very helpful and can run a warm relationship and I believe he has potential to carry out further valuable research. I wholeheartedly recommend him to study for PhD. degree at your university in the field of Computer Science. Prof. Dr.

Email abbas.aljuboori@uoitc.edu.iq | **Phone** (+964) 7902586717

Assist. Prof. Dr. Dhamyaa A. Nasrawi Assist Professor

The applicant Hasan deserves to participate in the given since he has excellent grade in our colleges. Furthermore he is interested and curious to go ahead and get old hand experience in the proposed course. The applicant's has academic fitness and general suitability to undertake the proposed course of research or study. He able to manage different responsibilities simultaneously effectively. Even he is not an English native speaker, but his English fluency is good and he can probably communicate. Now, he has experience in programming languages such as (C#, C++, C, Html, Css, Php, Java, JavaScript, Kotlin, and Python). He interested Software Engineering, Digital Marketing, and Machine learning. It is for these reasons that I offer high recommendations for Hasan without reservation.
